

Green Wind Renewables - moving forward

Over the last few weeks, our team have begun engaging with the neighbouring properties to our proposed Ambrosia Wind Farm. If we haven't spoken to you yet, we appreciate your patience while we try to contact everyone in the immediate area and hope to talk with you soon.

We've also had the chance to speak to some of the local businesses in the area on how we can work together in the future. Everyone's input is very important to us!

What's next?

We are excited to share we are now about to commence surveys which will inform the project design and future approvals documentation. Our consultants will be in the Moodiarrup area from May 27th 2024.

Ecological surveys are scheduled first and will be undertaken to determine the condition and potential significance of flora and fauna, which will inform the areas for targeted spring surveys later this year.

Want more information?

We are eager to provide you with information on the project and understand your perspective of our plans. Community consultation activities are an important and ongoing part of this process as we develop the Ambrosia Wind Farm.
